

Serial No. 10/695,695

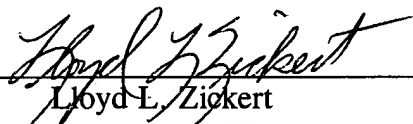

**REMARKS**

This amendment adds a paragraph on page 1 concerning the related parent application. It also updates the status of the applications mentioned on pages 14 and 16 to reflect the patents issuing from those applications.

New Claim 25 is also added in order to give Applicant adequate protection on the invention. It is submitted that this claim is patentable over the prior art and that it only differs from issued Claim 19 in the '468 patent with respect to the definition of the opening as set forth in the last lines of the claim. It is believed that Applicant is entitled to this claim, and it is fully supported by the disclosure.

An earnest endeavor has been made to place this application in better condition for allowance, and such action is courteously solicited.

Respectfully submitted,
